

CUTCO SINGLE KNIFE STORAGE SHEATH

Instructions for Safe Use

IMPORTANT:

- Use only knife type / product number that matches the appropriate sheath type / product number (Figure 1).
- Use only with Cutco Knives.
- Only sheath clean, dry knives.
- Do not expose Cutco Storage Sheaths to open flames or other sources of intense heat. Excessive heat can melt or burn the sheaths.
- Keep away from children.

Installing Sheath On Knife

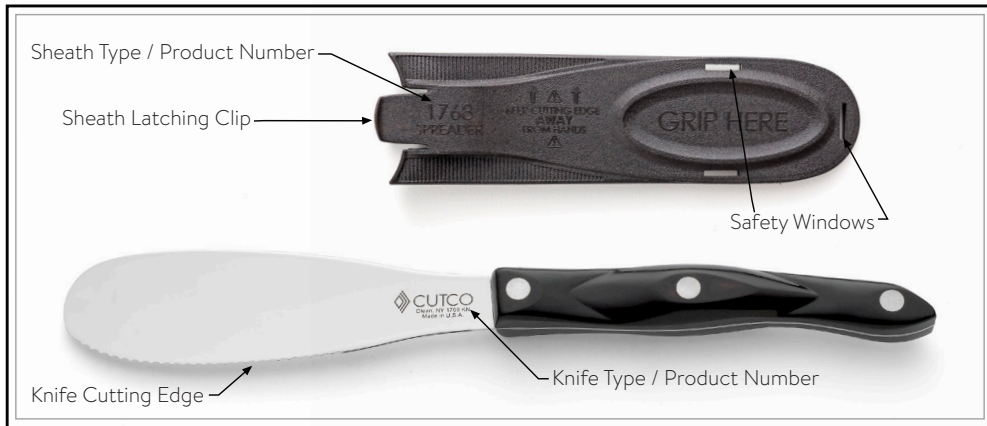

Figure 1

Step 1: Select the appropriate knife type / product number to match the sheath type / product number, as shown in Figure 1.

Step 2: With one hand, firmly grasp the knife handle with the knife cutting edge facing away from you and with the opposite hand, grasp the sheath with fingers where indicated by **GRIP HERE** (Figures 1 & 2). **ALWAYS** hold the knife and sheath as shown in Figure 2 and **NEVER** hold the knife and sheath as shown in Figures 3 & 4. **BE SURE** the arrows are pointing away from you.

YES

NO

Figure 4

Knife cutting edge facing you. Arrows on sheath pointing toward you.

↑ KEEP CUTTING EDGE AWAY FROM HANDS ↑

All arrows ↑ on sheath, and knife cutting edge must point away from you!

Step 3: CAREFULLY and SLOWLY insert the blade into the open end of the sheath (Figure 5) until the knife handle LOCKS into place with a NOTICEABLE CLICK (Figure 6) and you SEE THE KNIFE BLADE through the SAFETY WINDOW (Figures 1 & 7). ALWAYS keep eye contact during the sheathing process.

If the knife encounters significant resistance, STOP. DO NOT force. Carefully remove and make sure the knife and sheath are properly oriented with each other, knife type / product number matches the sheath type / product number and there are no obstructions in the sheath cavity!

Removing Sheath From Knife

Step 1: With one hand, firmly grasp the sheathed knife by the knife handle with the knife cutting edge facing away from you and with the opposite hand, firmly grasp the sheath with your fingers where indicated by GRIP HERE (Figure 8). BE SURE the arrows are pointing away from you.

↑ KEEP CUTTING EDGE AWAY FROM HANDS ↑

Figure 8

All arrows ↑ on sheath, and knife cutting edge must point away from you!

Figure 9

Step 2: CAREFULLY and SLOWLY pull the sheath off knife blade (Figure 9). ALWAYS keep eye contact during the sheath removal process.

Transporting

- Use extreme CAUTION when transporting sheathed knives. Sheaths are designed for easy removal, so use proper knife safety rules when transporting.
- ALWAYS hold the knife by its handle, DO NOT hold by the blade even with a sheath on it.

Storing

- Sheathed knives can be carefully stored in a drawer.
- Use CAUTION when removing a sheathed knife from the drawer to prevent accidental or unintended unsheathing.

Cleaning

- Sheaths are dishwasher safe, but we recommend hand-washing.
- Use warm, soapy water to flush out sheaths.
- Make sure sheath is COMPLETELY dry before using.
